RE: The City Council

My husband and I have been residents of Palmdale for close to 37 years. There are currently about 150,000 people in this city. If I'm not mistaken, it's up to the citizens to vote for mayor. It's not for the city council to decide he can't run again!

For years we had a mayor who did a pretty good job of destroying this city. Now we have a mayor who actually puts the city he represents first. So the city council has decided to take it upon themselves to tell him he can't run again? They've decided they will split the mayoral duties between the four of them. Not only that, the council waited until the rightfully elected mayor was out of town! Talk about no scruples.

The last I checked this is (for now) still the United States. The city council has really overstepped. This is NOT a dictatorship. If the city had wanted one of council people for mayor, they would have voted for them.

Thank you,  
Judith Barth

Please distribute to the city council and enter into the public record.
